PROJECT NAME

Six Mile Road & Old Island Hwy.
Road Expansion

Engineered for strength...
designed for beauty

The City of View Royal, used MagnumStone™ when expanding a road close to the Six Mile Pub (the oldest pub in British Columbia Est. 1855). Besides fulfilling the engineering requirements for the project, MagnumStone™ blended well with existing structures and contributed to maintaining the natural look for the historical business nearby. Manufacturing the top MagnumStone™ units at a custom angle on the sloping portion of the wall, simplified the creation of the traffic coping barrier, speeded construction time and lowered installation costs for the project.
